

# WE COVER UP LARGE SPANS

## We are PROFLEX. LARGE UNOBSTRUCTED SPAN ROOFS

Proflex Roofs provide large and clear unobstructed spans of up to 35 mts., resulting in flexibility of shop-floor layout alongwith free movement and effective handling of your goods.

Proflex uses innovative American technology that facilitates unique arch shaped self-supported Roofs, which sustain external load factors without any trusses, purlins, ancillary support or intermediate columns. This provides unobstructed clear spans up to 35 mts. and larger enclosed volumes, enabling higher flexibility of shop floor utilization alongwith free movement and effective handling of your goods. More so, for specific industries where gantry cranes are required, these large enclosed volumes suit best as they offer optimum clear space for movement.

All these lead up to vertical and horizontal free space, covering up your critical time and energy. 60 Lakh sq. mts. of Proflex Roofs have been installed at more than 3500+ projects across India, making it an ideal Roof for all your needs.

Long Lasting and Cost-effective | 100% Leak Proof | Aesthetically Appealing

  
Innovate. Lead.
